INTRODUCTION

Plastico Recyclers and Waste Management is a licensed provider of recycling and waste management services. The company is 51% Black female-owned and holds a B-BBEE Level 1 rating. Additionally, it is ISO compliant.

Plastico, a pioneering waste management company based in Brits, South Africa, stands at the forefront of environmental sustainability, with a steadfast commitment to transforming the landscape of waste through innovative solutions. With a vision rooted in environmental stewardship, the company has established a comprehensive approach to waste management that extends beyond plastics to encompass a diverse range of materials.

Plastico’s operations are underpinned by a dedication to the principles of the circular economy, wherein waste is viewed as a valuable resource to be recovered and reused. As South Africa grapples with the challenges of waste disposal, Plastico rises to the occasion, providing sustainable, scalable and customised waste management solutions that not only mitigate environmental impact but also contribute to the nation’s broader goals of a cleaner, greener future.

Our Vision

One of our main objectives is to contribute to a clean and healthy environment using integrated approach to waste management and our vision is to become the preferred company of choice for waste management solutions.

Our Mission

Our mission is to proactively anticipate the increasing demand for assistance in the field of waste management, comply with local laws and do business in an environmentally friendly manner within an integrated waste management framework.

Our Values

Trust
Integrity
Inclusion

Excellence
Commitment
Sustainability

PLASTIC RECYCLING

Plastico leads the charge in plastic recycling, employing state-of-the-art processes to transform discarded plastics into reusable materials. Through cutting-edge technologies, we strive to reduce plastic pollution and promote a circular economy.

40 000m³

RECYCLING FACILITY

We buy your plastic scrap.

We clean it - We sort it!

We turn your trash into treasure!

OUR SERVICES

WASTE MANAGEMENT SERVICES

GENERAL WASTE - we have an integrated waste management approach and on-site waste management service which provide the support a customer needs to introduce waste recycling at a factory, office building, shopping mall, hospital or other facility. This programme offers a solution that is both cost effective (as an income generated from the recyclables recovered) and provides customers with dedicated reports that enable them to track and report on the volumes of waste recycled.

Our services include but not limited to: **HAZARDOUS WASTE**

- On-site waste management
- Waste separation and minimisation
- Recyclable waste streams.

Hazardous waste is a waste that contains organic or inorganic elements or compounds that may, owing to the inherent physical, chemical or toxicological properties of that waste, have a detrimental impact on health or the environment.

NON-COMPACTABLE WASTE

Non-compactable waste is waste that can't be compacted or lifted by a compactor truck. This waste is collected with a skip truck.

Examples of non-compactable waste:

Concrete, bricks, cement, thick metals, tiles & wood.

Plastico ensures safe disposal certificates for all hazardous waste types. These waste can be classified as toxic, chemically reactive, flammable, corrosive or radioactive.

WASTE COLLECTION SERVICES

PLASTICO'S FLEET OF SPECIALISED WASTE TRANSPORT VEHICLES

We provide a safe, efficient and compliant solution for moving liquid, sludge and dry waste from our customers' premises to waste processing facilities, while remaining mindful of the best practicable environmental option. We ensure the highest level of legal compliance in hazardous waste collection and control - from sampling and testing to treatment and appropriate disposal or containment.
